## Who Are We?

Sustainability Steps Association is an NGO that has been actively promoting sustainable development endeavors nationwide and worldwide.

## Our Goals

We develop projects, organize trainings and workshops, and share inspiring practices regarding sustainable development in order to contribute to the transition towards sustainability in institutions and societies.

## Our Mission

Contributing to build a more sustainable world through collaboration and networking with individuals, institutions, and organizations that strive for a better world by adhere to mutual goals.

# Why Sunflowers

As Sustainability Steps Association, we believe that sunflowers symbolize our association. They reflect our perspectives and the way we approach problems.

Sunflowers act in harmony with each other. Their need for sun and light unites them for the same purpose. We are aware of the problems, but even in the worst moment, we take steps to see and magnify the light of the solution.

# Our Focus Areas

## ○ Raising Awareness

We organize events, trainings, make documentaries in order to raise awareness among individuals and create a social and environmental awareness on sustainability.

- Exclusive newsletters with original content
- Sustainability trainings
- Broadcasts with expert names

## ○ Increasing Existing Impact

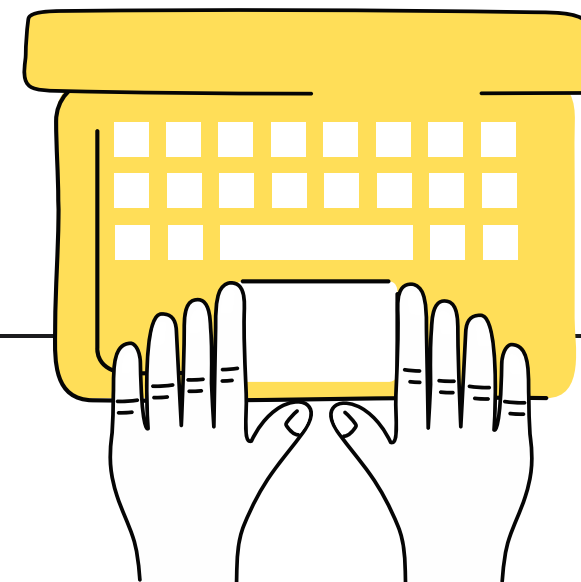

We aim to increase the impact that exists in the institutions and the society in the field of sustainability with the workshops and experience sharing events.

- Solutions workshop
- Experience sharing events

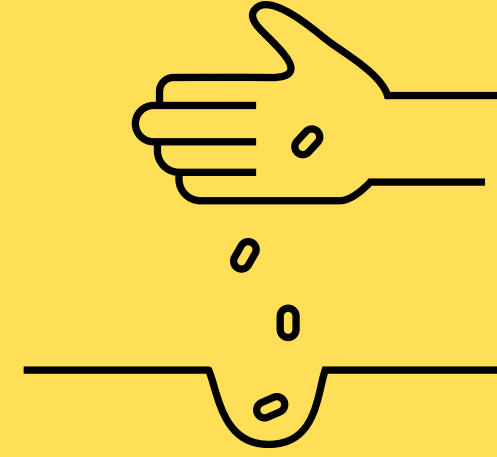

## ○ Activating the Society

We develop projects and provide consultancy to ensure the necessary transformation in institutions and social life in the field of sustainability.

- Sustainability oriented projects
- Internal projects for institutions
- Consultancy service

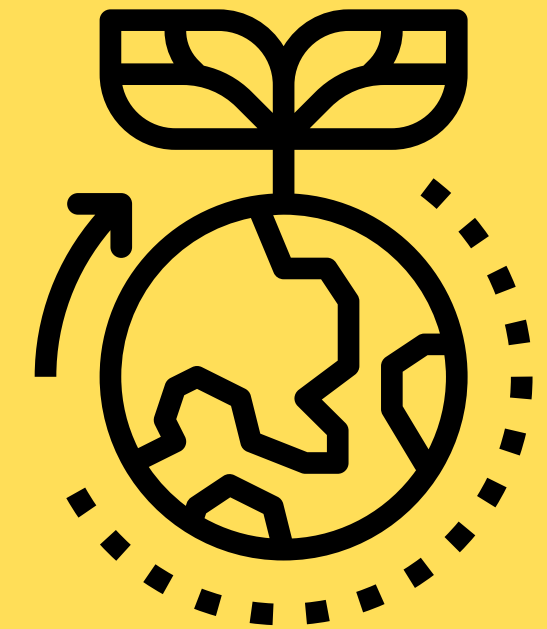

# Raising Awareness

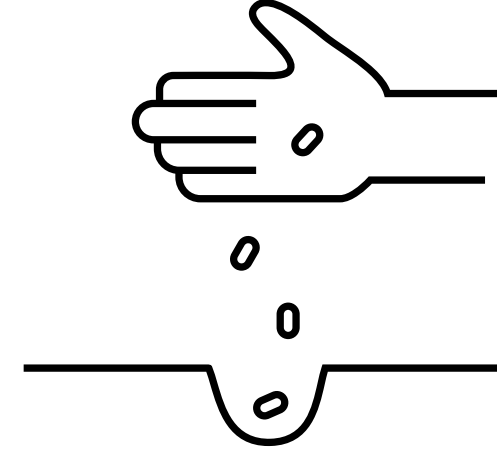

- **Exclusive Newsletters:** For the companies; we prepare newsletters in which we convey today's trends in sustainability, practical advice, and good examples from Turkey and the world.
- **Sustainability Trainings:** We provide trainings to increase the awareness of the company employees on sustainability and sustainable living, and to to know the basic concepts of climate change.

1. Introduction to Sustainability
2. Climate Action
3. Accessible and Clean Energy
4. Sustainable Living
5. Urban Gardening
6. Sourdough Bread

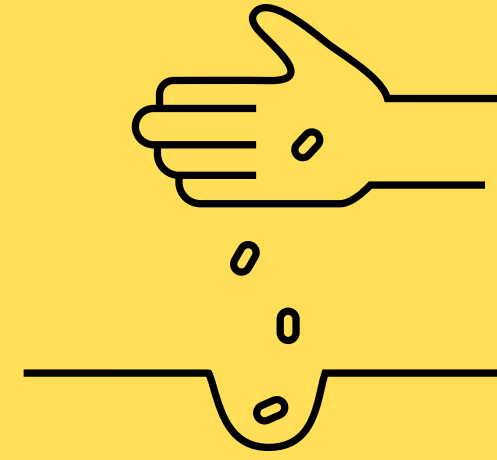

# Raising Awareness

- **Broadcasts with Experts:** In order to create a social awareness in the field of sustainability, we organize live broadcasts under the title of "Sustainability Agenda" with experts in their fields.

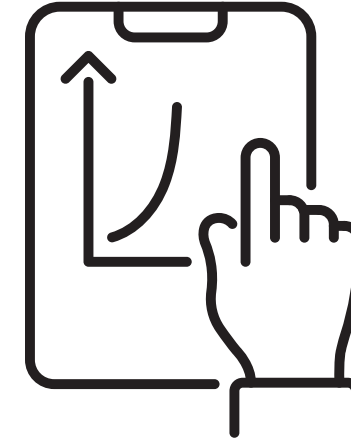

# Raising Awareness

- **Video Production:** We shoot documentaries about sustainable living studies in different regions of Turkey, and we produce video content for the dissemination of companies' sustainability efforts.

# Increasing Existing Impact

- **Solutions Workshop:** We organize workshops for companies and individuals to methodologically see how they can produce solutions to the problems they see in their environment with a focus on sustainability, to produce projects and take action.

# Increasing Existing Impact

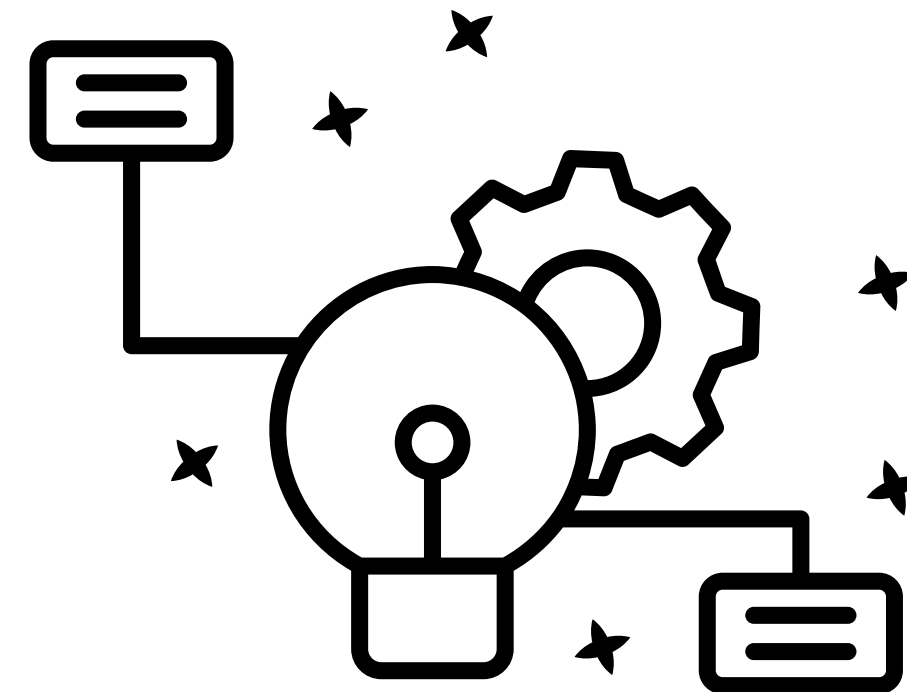

- **Experience Sharing Activities:** We discuss inspiring studies and good practice examples specific to Sustainable Development Goals with individuals and institutions from different sectors.

# Activating the Society

- **Sustainability-oriented projects:** We develop projects in order to ensure that sustainability is spoken by different segments of the society, and to ensure the necessary transformation in youth and institutions.
  1. Solutions to Problems Meeting
  2. Communication for the Goals
  3. Sustainability Agenda
  4. Environmental Events
  5. Digital Transformation for the NGOs
